Contribution of MeteoSwiss

Francesco Isotta

Contribution of MeteoSwiss for C3S2

- WP2, Production of ECV gridded datasets, 2PM in kind
- T2.2 Production of the regional ECV datasets → with ZAMG.

Production of bi-annual updates for the two versions of LAPrec (one starting in 1871, the other in 1901 with a different number of stations used). In the second update, a **methodological improvement** (extended calibration period and new settings) is performed

- Expertise: long-term, time consistent spatial analyses for Switzerland from 1864 (reconstructions), APGD.
- Risks: APGD update
- Stay in contact with the community, update LAPrec
