Climate
Change

Contribution KNMI to C3S2_311_Lot3

Focus:

- Contract management
- E-OBS (daily, monthly, half-yearly updates)
- Indices on E-OBS (yearly updates)
- State of the Climate

Collaboration:

- State of the Climate
- Data policy issues
- QC on stations

Expertise:

- Station details
- Gridding over Europe
- Contact with data providers

Climate
Change

Contribution KNMI to C3S2_311_Lot3

Possible risks:

- Providers cannot continue with open data licence for E-OBS
- Delay of dataset inclusions in the CDS due to e.g. limited resources by the CDS team
- No additional data in data sparse areas in E-OBS
- Stations in ECA&D cannot be updated anymore (funded internally by KNMI and internal IT migration issues)

Perspective of KNMI

- ECA&D and E-OBS form the climate data node of the European RCC
- Contributes to KNMI Global initiative
